Lightweight Tip

Aluminum Floor, Built to Last

Strength meets sustainability—lightweight aluminum for a floor that endure

Recycle, Renew, Reimagine

Designed for a circular economy—every component marked for recycling

User-Friendly Design, Effortless Operation

Intuitive and accessible—making every task easier with user-centered design

Maximum Payload, Ultimate Efficiency

Engineered to carry more—optimizing every journey with superior payload capacity

Lowest Maintenance Cost, Maximum Uptime

Designed for durability—minimizing costs, maximizing performance

This is the Perfect Fit

A lightweight, functional, robust product that is easy and quick to build and maintain, safe and secure to use, and capable of sustaining its own value and the value of the truck long-term.

Quality certified:

The Armaton Modular platform kit is tested and approved according to EN 12642 and EN 12640 to ensure top quality and a long product life.

Quality

Anodised aluminium is lightweight and robust, providing maximum possible payload and a minimal risk for corrosion.

Design:

A clean and streamlined design maximises the load area. New side rive profiles have integrated hinges and ergonomic handles provide maximum grip ease.

Stepless load lashing system:

Two step locks and 360 degree stepless load lashing system make securing goods quick and easy.

Easy to build, install and maintain

No special tools, workshop or jig needed. Aluminium profiles are maintenance free.

Functionality

Ready-to-use profiles slide easily into place in the frame profile. Screwed joints ensure self-centring. The result is a light and stable bed with no welding or special fittings.

Armaton Accessories

MP One Step

Armaton MP OneStep is a convenient footstep designed to integrate seamlessly into the dropside of the Armaton Modular Platform. Its unique design ensures it doesn't interfere with the loading area while offering an easy-to-use function, improving working conditions.

Key benefits include:

- No obstruction in the loading area.
- Easy integration and operation.
- Enhanced working conditions.
- Approved for a load of up to 350 kg.

practical solution for everyday use

Accessory for Armaton Modular Platform

Armaton MP Tarpaulin Kit is designed for the Armaton Modular Platform, making assembly and disassembly easy. The stand mounts into existing pillars on the dropside, and the tarpaulin attaches directly to the dropside without exterior straps or buttons.

Key features included:

- Separate curtain sides and roof for easy maintenance.
- Light-permeable roofing for better illumination in the load area.
- Transparent screen against the cab window for an overview of the loading area.

The tarpaulin can be equipped with removable side bars, simplifying loading and unloading from the side.

Armaton MP Tarpaulin Kit

The rear curtain can be a rolled up. Roll-up function for the sides can be added.

With side pillars the tarpaulin can be equipped with removable side bars to make loading and unloading easier from the side.

Easy to close with hidden straps and magnetic locking.

Armaton MP LongGoods

Accessory for Armaton Modular Platform

Armaton MP LongGoods makes transporting long goods vehicles safe and secure. It easily mounts into the dropside and front wall, providing a complete solution.

Key features include:

- **Secure transportation:** Minimizes risk of damage with various load securing options.
- **Easy Assembly:** Quick setup without special tools.
- **Adjustable and Lightweight:** Height-adjustable crossmember, made from anodized aluminum.
- **Protective Design:** Rubber strip for increased friction and damage prevention.
