

# Armaton MP LongGoods

## Accessory for Armaton Modular Platform

**Armaton MP LongGoods makes it possible to transport long goods in a safe and secure way on light commercial vehicles (LCV). With Armaton MP LongGoods, the load is safe throughout the transport and the risk of damaged goods is minimized.**

The long goods holder is mounted into the Armaton Modular Platform's rear flatbed pillars and together with the front wall it thereby creates a complete solution for handling long goods. Armaton MP LongGoods has a unique design with seamless connection to the rear pillar as well as several different load securing options. It quickly and easily assembled without special tools.

Armaton MP LongGoods is an accessory uniquely designed for the Armaton Modular Platform.

### **Additional features for the Armaton MP LongGoods:**

- Quick and easy to assembly. Screws together, no special tools needed.
- Equipped with a rubber strip for increased friction and to prevent damage of goods.
- Easy to adjust the height of the crossmember to different needs.
- Lightweight solution entirely in anodized aluminium.
